Mounted Shooters of America and The Cowboy Mounted Shooters Team Registry form an Alliance to further promote Mounted Shooting!

The sport of Mounted Shooting is growing and constantly evolving. As a way to offer more and keep things exciting, the Mounted Shooters of America and The Cowboy Mounted Shooters Team Registry have decided to form an alliance and work together to offer more recognition to mounted shooters and their shooting horses. Mounted Shooters of America President Cheryl Yaws and CMS Team Registry creator Karin Page realized that the two organizations nicely compliment each other. MSA currently tracks points based on dollars won, so promoting an additional option for MSA members to be recognized based on overall scores adds more excitement. MSA also requires the use of only one horse per rider, per match, which fits with the CMS Team Registry guidelines of being a “team”.

So what does this alliance mean for MSA members? Current MSA members receive a \$5.00 discount on CMS Team Registration, which offers an additional way to have Mounted Shooting points tracked. It means promotion of MSA via the CMS Team Registration newsletter, website and additional marketing opportunities. MSA will be working with the Team Registry to promote both organizations, which should increase MSA membership, which means more competitors and we know what that means...bigger paybacks!

The CMS Team Registry tracks points unlike any Mounted Shooting Association. There is one point awarded for each competitor a team beats in the overall results of a match with divisions by breed! There are no double, triple, etc. points awarded for special matches, so you don't need to travel far to be competitive. End of the year high point awards will be presented and every team registered receives a certificate indicating the total number of points won that year through the CMS Team Registry. Now you can not only tell people about your shooting horses' accomplishments but show them too!
